LANVIN TAYLOR II, D.O.

Dr. Lanvin Taylor is a board-certified physiatrist, or physical medicine and rehabilitation physician. He is originally from Brentwood, NY and received his Doctor of Osteopathic Medicine at Rowan University School of Osteopathic Medicine in Stratford, NJ.

Following his formal education, Dr. Taylor completed a traditional rotating internship at Rowan University School of Osteopathic Medicine. He then completed a physical medicine and rehabilitation residency at Temple University Hospital in Philadelphia, PA.

Throughout his career, Dr. Taylor has contributed to his field through formal presentations and publications. He has spoken on issues such as lymphedema, stroke syndromes, and corticobasal degeneration. He has also published information on orthotics in *Current Diagnosis and Treatment: Physical Medicine and Rehabilitation*.

Dr. Taylor holds professional affiliations with the American Academy of Physical Medicine and Rehabilitation as well as the American Osteopathic College of Physical Medicine and Rehabilitation.

In his spare time, Dr. Taylor is an avid sports and fitness enthusiast. He primarily enjoys basketball, football, and periodized training.
IRMC Physician Group Physical Medicine and Rehabilitation, or physiatry, specializes in enhancing and restoring functional ability to patients with physical diseases, disabilities, and injuries. These conditions are typically of musculoskeletal, cardiovascular, neuromuscular, or neurological nature.

Doctors who specialize in this field are referred to as physiatrists. These specialists are nerve, muscle, and bone experts who are skilled at developing a non-surgical, comprehensive program for restoring your life after an injury or disease.

Our board-certified physiatrist recognizes your unique health needs when it comes to your body. We offer a broad spectrum of diagnostic techniques to treat your condition with the least invasive approach.

A physiatrist’s treatment focuses on helping the patient become as functional and pain-free as possible in order to participate in and enjoy life to the fullest extent.

- Rehabilitation
- Strengthening Exercises
- Peripheral Joint Injections
- Trigger Point Injections
- Medication

“Most of the doctors I see work within this group. I have had very good care, professional, and very knowledgeable. I am sure anyone working with this group would be pleased.”
